MaxiCut 5 Ultra Open Back

Code: 443745

Features

- Unit: Pair
- Size: 6/XS, 7/S, 8/M, 9/L, 10/XL, 11/2XL, 12/3XL
- Coating: Foam Nitrile
- Colour: Indigo/Black
- Fabric: Nylon/Lycra
- EN 388:2016: 4542C

Product Details

If you're after a reliable, cut-resistant glove that's comfortable to wear, then you can't do better than the MaxiCut 5 Ultra Open Back. It's respected across the globe and has set the standard of what is possible.

With the popularity of our standard Maxiflex glove, many of our clients asked if we could create a glove that would still be lightweight, dexterous, and comfortable, while also being cut-resistant. After numerous trials and testing, what we came back with was the MaxiCut 5 Ultra Open Back glove.

It is a precision handling glove for dry environments, featuring the latest knitting technology, with innovative fibres and 360 breathability. The glove is ideal for warehousing, assembly, and handling metal, plastic, and glass.

This glove uses high performance yarns and fibres that offer excellent cut protection while still being comfortable to wear. The glove is also reinforced between the thumb and forefinger, extending the wear life and protecting an inherently weak area.

If that all sounds good to you, then make sure you order today.

Features and Benefits

- Innovative fibres - we source our base ingredients to develop our own unique high performance yarns and fibres that offer cut protection whilst maintaining high levels of comfort.
- Reinforcement - between the thumb and forefinger, improves cut resistance and extends glove life in an inherently weak area.
- 360° breathability - patented micro-foam nitrile coating offers 360° breathability, making it the most breathable glove on the market today.
- Form, fit and feel - mimics the "hand at rest", reducing hand fatigue and increasing comfort.
- Latest knitting technology - utilised to produce smooth and rounded fingertips, improving fingertip sensitivity.
- Consistent liner penetration- from the nitrile, leaving only the soft liner resting against the skin.
- Optimised grip delivered through our micro-cup finish, allows for a controlled grip.

Applications

- Handling ceramics, corrugated sheets, non-deburred parts, glass panels, plastics injection moulds, sharp edged metal sheets, small sharp components
 - Logistics and warehousing
 - Maintenance
 - Primary, secondary and final assembly
